Cppcheck-gui. Cppcheck usage.

An optional toolbar. The GNU versions of these tools are recommended. Meaning value 0 Sort the symbols by name 1 Sort the symbols by appearance (line number) xml indent tags If this configuration is set to TRUE, a new line after the end of a line with an unclosed XML / HTML tag. "LPR" geany default tools grep a grep tool. Enable add-on support Allow accessories to be used in Geany. You can change the number of files recently inaugurated in the Preferences dialog box. If you are already showing the end of the symbol, it shows the completion of the word of the document, even if it is not enabled for automatic endpoint. Double / deploy all children from a folding point, either to fold / deploy all children's fold points when a main line is folded. The list of autocomplete is updated as more characters are written so far. Line of comments or current selection. ALT-SHIFT-HOME go at the end of the document. Note Geany tries to load libvte.so. -P --No-preprocessing does not preprocess the C / C ++ files when generating label files. If the program is defective, it assumes the cost of all the necessary services, repair or correction. If you do not have Libvte.so.4 installed, then the terminal support is automatically deactivated. The user's configuration directory can be canceled with the -c switch, but this is not normally done. The regular expressions of multiple lines work like those of a single line, but a coincidence can cover several lines. You can specify the directory where the backup is saved and you can configure the aggregate extension automatically in the Dialogue Configure in the Geany Plugin Manager. To use them, choose the new coincides with the part of the file name, not the route. If the program does not specify a version number of this license, you can choose any version published by the Free Software Foundation. The user's configuration directory is normally: /home/username/.config/geany The system path is the data subfolder of the installation path in Windows. In addition, you can disable the use of the Terminal Widget by Command Line options. FALSE immediately use atomic file saving Defines the GEANY COMMON mode Saved files on the disk. Option Default Description Geany min Symbollist chairs How many characters you need to write to activate the autocomplete list. The second argument sets the background color for the drawn rectangle. Change to the message window tab. Perform the formation of line numbers, for example, geany some_file.foo :55:4 This would open the file file foo with the cursor in line 55, column 4. Additionally, there are some options To modify the printed page (s). 10 geany default font symbols and open files. Save the position of the window, so the next time you open Geany is in the same location. GeanyVersion The real version of the Geany, for example. "Geany 1.38". This will insert the entity for the character in the current cursor position. The Search dialog box is used to find text in one or more open documents. Delete markers and error indicators. Combine Delete bookmarks and eliminate the of mistake. This section allows the definition of the specific default bleeding configuration for the file type, nullifying those configuration for the file type, nullifying those configuration for the file type, nullifying those configured in the preferences. Write the type of forced sanger. Example: predetermined = 0x000000; 0xfffffff; False; Fake style selection style Color selected text. The byte's order mark helps detect the encoding of a file, for example. If it is UTF-16LE or UTF-16BE and so on. The projects can also be opened, but a project file (* .geany) must be the first non-options argument. Click again (or use Ctrl-M again) to delete the bookmark. Each pop-up window, menu dialogs, or anything else that can make the editor lose focus, will make the current document saved. The backup is called File Name ~. If you know that Geany does not open a certain file, you can add the specification line, described in the following section, at the beginning of the file to force GEANY to use a specific encoding when opening the file. E.g. If a new .c file is created using the file.> new (with the template), then the Untitled.c text on the line 2 would be replaced with the name of the file chosen in Save as ... These options must be in the Manual page of the cass. This is useful when you use the line wrapped, virtual, not the real start of the entire line. This matches 0 or 1 time (s). In addition, the mere aggregation of another work that is not based on the program with the program (or with a work based on the program) in a volume of a storage or distribution means does not bring the other work under the scope of this license. While operating a project, the compilation means does not bring the other work under the scope of this license. can be established for the Lexer Scintilla in the KEY.NAME.FIELD = Some.Value format. Move the line (s) down Alt-Pagedown Move the current line or the selected lines down into a line. This can be useful when making temporary text copies or to create with similar or identical contents. Goto Orming Brace Ctrl-B If the cursor is ahead or behind a clamp, then it moved to the clamp that belongs to the current one. List of symbols. The GTK documentation for the configuration for more details. Substitution sequences for fragments To define the fragments You can use several special character sequences that will be replaced when the fragment is used: 0% newline% Insert a new line (it will be replaced by the EOL CHAR (S) used: LF, CR / LF, or CR). If GEANY can not find any libvte. You can also edit the default file templates. This is a bits putty of the values: 0 - Visual flags drawn near the edge 1 - Visual flag at the end of Subline drawn near the text 2 - Visual flag at the beginning of Subline TEXT near the text only in Solo and Second Agrees. If there is no selection, the entire current line is used to mark the comment as an alternate. Detecting the width of the file Try to detect and set the sangres width at function of the file content, when a file is opened. -T-no terminal does not load terminal support. You can not impose more restrictions on the exercise of recipients of the rights granted in this document. You can automatically copy all styles from another fillet type definition file using the following syntax for the group [Style]: [Styling = foo] where foo is a file name name. Example: brace bad = 0x0000ff; 0xffffff; real; Fake dart style for coloring the face (the blinking cursor). The selected text will be sent to the standard entry of the executed command, so the command must be able to read it and you must print all the results at your standard output that Geany will read. These markers can be deleted by selecting the Delete bookmarks command in the document menu. The current file type and any characters at the end of the line, such as {,} for C,: For Python. You just need to establish fields you want to use in your records. D: Decimal Dglets D: Any character except decimal dogettes S: blank spaces (space, \t \r \f \v) S: Any char, except blank space (see above) W: alfanum © rich and underlined \x This allows you to use an X character that would otherwise have a special meaning. Otherwise, you can scroll a page further, even if there are no real lines. Please note that it works slightly differently from other GTK applications, as you must continue to pressress the Ctrl and Mayions keys at the same time you wrote the hexagonal dugs of the code point (and the entry or return to finish the code point). Comment Tender marker A chain that is added to alternate a line comment in a source file. 8. For custom file types, the file name for foo is different: filetypes.foo.conf View the link to get more information. Membership of the FileType Group. -I - New-Insta Ulture does not open files in an execution instance, force opening a new instance. Alternate Lever Comments A line If you are not discussed or delete a comment if the line is discussed. The GREP tool must be properly set to preferences to the Rouple Route of the System. It is only used when the complete keybinding fragment is established in space. It is useful when you know that GEANY can not automatically detect the encoding of a file and is not displayed correctly. These can get rid of the Undo command. Start of the route to begin when it opens or saves files. "GREP" GEANY DEFAULT MRU LENGTH The length of the "Recent files" list. Many people have made generous contributions to the wide range of software distributed through that system in dependence on the coherent of that system; It depends on the author / donor to decide if he or she is willing to distribute software through any other system and a licensee can not impose that election. Only available if Geany was compiled with support for sockets. By default, the Save button and the menu item are disabled when a file does not change. When you use uses Recurse on the subfolder option with a directory that is under the control of the version, you can configure the Additional Options field to filter the version control files. Each file type has a corresponding filetype definition file. A minuscle selection will be changed in Mayinscula, and vice versa. Note Geany automatically recharges the template information when you notice that it saves a file in the user's template configuration directory. c) If the modified program normally reads the commands interactively when it is executed, it must cause it, when it was started on the execution of said interactively when it is executed, it must cause it, when it was started on the execution of said interactively when it is executed, it must cause it, when it was started on the executed, it must cause it, when it was started on the execution of said interactively when it is executed, it must cause it, when it is executed, it must cause it, when it is executed on the execution of said interactively when it is
executed on the execution of said interactively when it is executed on the execution of said interactively when it is executed on the execution of said interactively when it is executed on the execution of said interactively when it is executed on the execution of said interactively when it is executed on the execution of said interactively when it is executed on the execution of said interactively when it is executed on the execution of said interactively when it is executed on the execution of executed on the execution of executed on the execution of executed on the saying that you provide a guarantee) and that users can redistribute the program under these conditions, and tell the user manually update the filetype extension file). Hide the dialog box Search hide the dialog box Search after clicking Search Next / Previous. The long lines, or as a suggestion to the user to break the line. Also dry the line of statistics of documents (after a short waiting time). The default configuration directory is ~ / .config / geany / and ahà is where geany.conf and other configuration files reside. The command in SÃ can be specified without the full route, then searched at \$ route. The sidebar window. While this is the expected behavior, it can lead to diffose problems if one does not think about writing an expression. immediately MSGWIN_STATUS_VISIBLE If you want TABLE IN THE WINDOW TRUE TOTENTS MSGWIN_MESSESSES_VISIBLE If you want TABLE IN THE WINDOW TRUE TOTENTS MSGWIN_STATUS_VISIBLE If you want TABLE IN THE WINDOW TRUE TOTENTS MSGWIN_MESSESSES_VISIBLE If you want TABLE IN THE WINDOW TRUE TOTENTS MSGWIN_MESSESSES_VISIBLE If you want TABLE IN THE WINDOW TRUE TOTENTS MSGWIN_MESSESSES_VISIBLE If you want TABLE IN THE WINDOW TRUE TOTENTS MSGWIN_MESSESSES_VISIBLE If you want TABLE IN THE WINDOW TRUE TOTENTS MSGWIN_MESSESSES_VISIBLE If you want TABLE IN THE WINDOW TRUE TOTENTS MSGWIN_MESSESSES_VISIBLE IF you want TABLE IN THE WINDOW TRUE TOTENTS MSGWIN_MESSESSES_VISIBLE IF you want TABLE IN THE WINDOW TRUE TOTENTS MSGWIN_MESSESSES_VISIBLE IF you want TABLE IN THE WINDOW TRUE TOTENTS MSGWIN_MESSESSES_VISIBLE IF you want TABLE IN THE WINDOW TRUE TOTENTS MSGWIN_MESSESSES_VISIBLE IF you want TABLE IN THE WINDOW TRUE TOTENTS MSGWIN_MESSESSES_VISIBLE IF you want TABLE IN THE WINDOW TRUE TOTENTS MSGWIN_MESSESSES_VISIBLE IF you want TABLE IN THE WINDOW TRUE TOTENTS MSGWIN_MESSESSES_VISIBLE IF you want TABLE IN THE WINDOW TRUE TOTENTS MSGWIN_MESSESSES_VISIBLE IF you want TABLE IN THE WINDOW TRUE TOTENTS MSGWIN_MESSESSES_VISIBLE IF you want TABLE IN THE WINDOW TRUE TOTENTS MSGWIN_MESSESSES_VISIBLE IF you want TABLE IN THE WINDOW TRUE TOTENTS MSGWIN_MESSESSES_VISIBLE IF you want TABLE IN THE WINDOW TRUE TOTENTS MSGWIN_MESSESSES_VISIBLE IF you want TABLE IN THE WINDOW TRUE TOTENTS MSGWIN_MESSESSES_VISIBLE IF you want TABLE IN THE WINDOW TRUE TOTENTS MSGWIN_MESSESSES_VISIBLE IF you want TABLE IN THE WINDOW TRUE TOTENTS MSGWIN_MESSESSES_VISIBLE IF you want TABLE IN THE WINDOW TRUE TOTENTS MSGWIN_MESSESSES_VISIBLE IF you want TABLE IN THE WINDOW TRUE TOTENTS MSGWIN_MES the current selection before sending it to the terminal so as not to execute the arbitrary code. They can also be canceled by projects: see Project Management. Load files from the last session at the start, load the same files that you have opened the last time you used GEANY. It is possible that some keys are not available with some national keyboards or because they are taken by the system, as for a windows or gtk administrator. If this also fails, you must verify if you installed Libvte correctly. 7. Delete Line Start Ctrl-Shift-Backspace Remove from the beginning of the line to the current Caret position. An optional sidebar that can show the following tabs: Documents: A list of documents and symbols: a list of symbols in your code. Because the program is licensed free of charge, there is no guarantee for the program, insofar as allowed by the applicable law. Toggle The sidebar. If you do not like it or do not need it, you can simply disable the folding bracket completely in the Preferences dialog box. Next to the current, either to place the file flashes next to the current tab instead of on the edges of the notebook. The option use multiple line matching dialog box to select a single-line or multiple line matching dialog box to the configuration script. For many types of files, nested folding is supported, so there may be several fold points. All the risk in terms of the quality and performance of the program is with you. This should help not create readable files in the world in Directories of insecure destination as / tmp (especially useful in multi-user systems). % And the number of scintilla style in the position of the Caret. Default Access Direct Access Direct Access Description Change to the left document (This marks the beginning of a region to label a coincidence. This will produce a small green symbol in the range. A value of 0 deactivates the automatic updates, so the list of symbols will only be updated. When you save document. GEANY provides support to detect and convert character sets. This is enabled when the mode is more than simply basic, and it is also controlled by a filetype configuration: See XML indent_tags. Switch to the sidebar. Focus the document Ã, Last Document Move The document updates the last position. Select the current line (s) Alt-SHIFT-L Select the current line under the cursor (and any partially selected line). -R --Read-only mode. All wildcards must be enclosed by "{" and " } ", for example. {fech a}. In systems similar to UNIX, this is commonly / usr if it installed from a binary package, or / usr / local if it is based on the source.% Git format-patch head ^% git checkout master # returns to the teacher and then send it to Tha T file to the mailing list for review. All missing adjustments will be read in the corresponding system configuration file. The following wildcards for file names are available:% f -Complete file name without Route% e - File name without route and without example: compiler = GCC -WALL -C "% F" Linker This element specifies the Command to link the file. Currently it can be used Store and open session files in project function. [Construction Menu] will cancel those in this section. Select to the next part of the word (extend) the selection to the next part of the word LEITE. The two sections "predetermined" and "Special apply" special " All types of files. The types of files. copyright of the FREE Software Foundation, write to the FREE Software Foundation; Sometimes we make exceptions for this. Such types of files have this configuration files. All missing adjustments will be read in the system file. For example, \ t will be transformed into a tab of tab. Go to a particular line number in the current file. If the first character in the set is ^, it coincides with the characters that are not in the set, that is, complements the whole. These actions are prohibited by law if you do not accept this licenses for most software are designed to remove the freedom to share it and change it. Fold all the folds all the contractable codes blocks. Some examples are: # coding = ISO-8859-15 or: # Coding: ISO defible fragments by the user. See the Section Matching Options. The first road is the prefix. Keeping the control by freeing the mouse button will copy the text instead. However, nothing more gives permission to modify or distribute the program or its derivative works. To help perform an XML / HTML válido document, the add-on supports the replacement of special characters known by the complement. Then, you can edit the file and the changes even will be available after a GEANY update. With the following options, you can define for Characters must work.) This marks the end of a tagged region. You can also clone the GEANY repository in GitHub and send an extraction request. You can modify your copy or copies of the program or any part of it, forming a job based on the program, and $\hat{a} \in = 2.5.2$ you can use the argument -Exclude-dir to filter CVS and hidden directories such as .svn. Default format: dd.mm.yyy and hh: mm: SS ZZZZZ. Replace the eyelashes with space. It replaces all the tabs with the correct amount of spaces throughout the document, or the current selection. Drink of the default configuration with project equivalents. This is useful if the encoding of the file can not be detected correctly. Previous Goto Marker Ctrl-, Goto The previous scoreboard in the current document. Let it comment to use default characters or define it to add or delete characters to fit your needs. From the command line: To start Geany from a command line, type the following and press RETURN:% GEANY, the GEANY window is shown in the following figure: The work area has the following figure: The work area has the following figure: The work area has the following and press RETURN:% GEANY window is shown in the following figure: The work area has the replicated on the backup copy path. Find everything in the session does the same for all open documents. You can also adjust some view settings (below the View Menu) that persist between the Geany sessions. Go to the definition of the word or current selection. The command can be configured for each type of filletius or if it is not configured, a global command will be used. It was developed to provide a small and rapid IDE, which has only some dependencies in other packages. -g - generate Global label file (see Generate a global label file). See the configuration files. You can also specify some command line options. Store the project file within the Base Directory of the Project, the default route for the project, the default route for the project. This works for the main window. Make the CTROL-SHIFT-F9 personalized goal create the current file with the tool makes and a certain objective. Define what you need. The current word is taken from the pop-up menu, click on the pop-up menu
is used. 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA UU All are allowed to copy and distribute Verbatim copies of this license document, but it is not allowed. Company for La Company for La Company for La Company for La Company that the developer is working. This can be used to read the documents currently open in Geany from a script or external tool. Redo Ctrl-and re-makes the last action. If there is nothing to find, or the cursor is next to an existing coincidence, the highlighted matches will be eliminated. If the program specifies a version number of this license that is applied and "any subsequent version," you have the option to follow the terms and conditions of that version or any subsequent version published by the Free Software Foundation. Keep in mind that the chain can be translated, so change only if you know what you are doing. See also the configuration file routes. Geaney_default_tools_browser A web browser. You can not find or can not find or can not find the specified command, comfort is replaced with an empty string. Go to the previous part of the word Ctrl- / Goto the anterior part of the current word. The text field of the base route is configured for ~ / Projects / Name. Syntax to use the option of regular expressions is shown in regular expressions. The project file configurations are saved when the project is closed. Decrease in sangria for a space Ã, deindents the current line or selection for a space. It can be useful when Geany is installed on a multi-user machine and additional supplements are available in a common location for all users. This only applies to open files or project files are not affected. The source file for him is located in the Doc de GEANY subdirectory. By default, no add-ons are loaded at the start until you select some. Second argument: If the visual flags are wrapped to indicate that a line is wrapped to indicate that a line is wrapped to indicate that a line is wrapped near the border or near the text. from the limits of the words. Only text files are supported, that is, the opening files that contain null-bytes can fail. Note: Comment use indent = True would generate this if a line is discussed (for example, ctrl-d): #command example (); comment use indent = True would generate this if a line is discussed (for example, ctrl-d): #command example (); comment use indent = True would generate this if a line is discussed (for example, ctrl-d): #command example (); comment use indent = True would generate this if a line is discussed (for example, ctrl-d): #command example (); comment use indent = True would generate this if a line is discussed (for example, ctrl-d): #command example (); comment use indent = True would generate this if a line is discussed (for example, ctrl-d): #command example (); comment use indent = True would generate this if a line is discussed (for example, ctrl-d): #command example (); comment use indent = True would generate this if a line is discussed (for example, ctrl-d): #command example (); comment use indent = True would generate this if a line is discussed (for example, ctrl-d): #command example (); comment use indent = True would generate this if a line is discussed (for example, ctrl-d): #command example (); comment use indent = True would generate this if a line is discussed (for example, ctrl-d): #command example (); comment use indent = True would generate this if a line is discussed (for example, ctrl-d): #command example (); comment use indent = True would generate this if a line is discussed (for example, ctrl-d): #command example (); comment use indent = True would generate this if a line is discussed (for example, ctrl-d): #command example (); comment use indent = True would generate this if a line is discussed (for example, ctrl-d): #command example (); comment use indent = True would generate this if a line is discussed (for example, ctrl-d): #command example (); comment use indent = True would generate this if a line is discussed (for example, ctrl-d): #command example (Command Example (); Note: This configuration only works for line comments (such as '//', '#' or ';'). However, the parties that have received copies, or rights, from you under this license will not have its terminated licenses, provided that such parties remain full compliance. It is similar to the option Find everything in session in the Search dialog box. The tabs adjust the scripts with a grass feature per sangria level, and The tabs like the width of sangria. Default access direct access Clon description, see cloning documents window). It can contain any configuration that is in the usual. usual. File created by Geany, but you do not have to contain all configurations. Note that this does not apply to DIFF, p documents. patch files. 2 or more spaces. Normal shell appointments are allowed, so you can do things like: The previous example would normally be performed with the function replace all the functions, but it can be useful to have common commands already configured. All color definitions and other specific configurations of the file type are stored in the fil nullifying compilation configuration. Name of the description New Creation of a new file Open an existing file Save All open files Return the current file from the disc Close the current file from the disc Close the current file Save All open files Return the current file Save All open files Return the current file from the disc Close the current file from the disc Close the current file form the disc Close the current file Save All open files Return the file Save All open files Return the file Save All open files Return the current file from the disc Close the current file from the disc Close the current file form the disc Close th selection peg peger The contents of the clipboard Delete Delete the current selection Undo the last modification Redo the last MavBack modification forward A compilation of Location Compiling the current file, includes a submenus to make commands. Properties A ¢ shows Project Properties. Print Line Numbers Prints the line number to the left of its role. FileHeader the file header template. Year specify a format for comfort {year}. Refer to the MuñoCeras section of the notebook table to see the useful shortcuts, including changes in most used documents. For example: [Nam. only one All wildcards that are listed as available in the fragments can be used. Action Description of default shortcut Ctrl-z (c) UN-has the last action. In general, users will not have to do that. The configure script supports several common options, for a detailed list, type: \$./configure -hell may also want to read the installation file for advanced installation options. The command output will be used to replace the current selection. For example, SA + M coincides with Sam, Saam, etc. For example, to improve the previous example; [predetermined] myname = my name is {developer} mystem = my system: {command: uname -a} this will replace myname with "my name" and the value of the preferences developer of preferences of templates are stored in the directory ~ / .config / Geany example:% cp /usr/local/share/geany/ui toolbar.xml /home/username/.config/geany/ Then edatelo and add any of the available elements. Go to the declaration of the existing elements. Go to the declaration of the existing elements listed in the file or delete any of the available elements. others will only affect the open or created documents before restarting. Date of the current date. Print CTRL-P (c) Print the systems similar to the UNIX (see the installation prefix) the Lib subfolder of the installation route in personalization. Personalization. Using the correct file -name extension format shown above, for example, CP Fileypes.FOO FILETYPES.BAR.conf and then add the lexer_filetype configuration = FOO (if you are not present) and add/adjust other configurations. GNU GREP is recommended (see note below). Only the second argument is interpreted Current Chars does the same as the basic, but also notes a new line after an orthopal device '{', and those indentes when writing an orthopal apparatus '}'. Only the first argument is interpreted. The coding field can be used to define the encoding of the #RRGGBBB format, then the DIALOGO box will show that color after opening. Remove the markers ¢ Remove the markers in the lines or words that were established using 'mark everything' in the Basqued dialog box or manually marking the lines. Keep in mind that you can also use the colors named also replacing the color value with the name of a color as defined in the section [Nam. When the project session support is enabled, Geany will close the archives of the project session and open the predetermined session files previously closed. Geany tries to suggest the most close more (current file symbol, other open documents or current directory) as the best candidate for Goto and place this symbol at the beginning of the list written in bold. SP bloody with spaces. You must follow the same names: in particular, some Lexers only admit a list of keywords, or none. If Ctrl-Shift releases before pressing Enter or Return (or any other fault), the insertion of the code is completed, but the written character is also entered. Otherwise, the Tab key will insert a tab fishe in the (which may be different The sangria, depending on the type of bleeding). You can start several instances of geany, but only the first will charge files from the last session. Use the tools-> configuration files-> fragments. Element of the Conf Menu. Keep in mind if the The symbol is in the current line, Geany will first look for a declaration of symbols, since this is more useful. Confirm the output Have a pop dialog box to confirm that she really wants to leave the geany. TIMEOOUT disc verification The second number to periodically verify the file of the current document on the disk in case it has changed. Ctrl-left next word. Delete status messages in
the status bar, delete all messages from the status bar. List of switch status message in the new message change to the status message tab (in the portator window at the bottom) Once a new status message tab (in the portator window at the bottom) Once a new status message arrives. Compiler: the compilation output or construction programs. But it is also possible to use it with languages interpreted as Perl or Python. You can hide unimportant code sections and concentrate on the pieces in which you are working and then you can show the hidden sections again. True immediately Reload clean doc on file chive Red-reducing automatically documents that do not have changes, but have changes on the disk. In such cases, you can find the error message that occurred in the GEANY standard error and in the Help Dialog box -> Development messages. Company for La Company for La Company for La Company that the developer is working. There is also a command line option, -p, which prevents the add-ons from loading. Initially the initials of the developer is working. configuration file, please contact it in your user configuration directory. PC% percent (used to escape eg% in block% in fragments). Use the Current under the cursor To find the dialog boxes use the current word below the cursor when you open the search, look for the files or replace the dialog box and there is no selection. Pressing it again will go at the beginning of the line. False immediately show editor scrollbars If you want to show the scroll bars. Preferences are rarely used, explained in the table. It is also possible to create a zero column selection, this is useful to insert text into several lines. If you have not installed Evicine or simply want to use another PDF viewer, you can change the program to use in the file settings .ini (usually found at ~ / .config / gtk-3.0, see GTK documentation). Virtual space is the space beyond the end of each line. The "program", then refers to any program or work, and a "program" based on the program " means the program or any work derived under the Copy Rights Law: that is, a work containing the program or A part of this, whether Verbatim or modifications and / or translated into another language. If no text or subsequent clicks are not selected, the color code is inserted into the current cursor position. Do not touch this configuration when it is built into a system that is not Win32. An example to use this could be that it has a file with the ISO-8859-15 encoding, but GEANY constantly detects the file encoding as ISO-8859-15 encoding, but GEANY constantly detects the file encoding as ISO-8859-15 encoding. Caret is located. Note The option Using the multiple line matching dialog allows regular expressions of multiple lines. You can also load and download add-ons in the fly with this dialog box. Use \\ for an inverted literal bar. In a regular expression, the following characters are interpreted :. For Windows, you can download and installer on the website that pave these libraries. Geany also provides an alternative basic impregnation support using a custom printer command. Sometimes, you may need to request a specific help of your distribution. Basic syntax is described in Table A Stop scrolling in the last line of the document. Use the tools-> Configuration files-> FileType Extensions.conf Article article. Editor Sets the positioning of the editor's portable tabs to the right, left, upper or bottom of the editor sets the positioning of the editor's portable tabs to the right. can be difficult to read with a proportional source. All the characters after that this position is lost and they are not written when it saves the file. A ShorthHand S-E (Start DASH End) is used to specify a set of S characters up to E, inclusive. Example: comment open = /* comment close If multiline comments are used, this is the character or the string to close the comment. TRUE immediately "Buildness' group A ¢ numper_ft_menu_items The maximum number of menu elements in the FileType compilation section of the common windows and conventions of GTK +. See also the configuration file routes When set to TRUE, GEANY first calls for the content in a temporary file and, if this happens, the temporary file moves to the actual file to save. Insert the space in Alternative White. Insert a tab of tab when spaces for bleeding should be used and inserted space characters from the amount of a width of the tab when the flashes for the sangria should be used. In addition. S, you need, of course, a C and C ++ compiler. If the program is interactive, let it issue a short notice like this when it starts in an interactive mode: GNOMOVISION comes without a quarantee; For details type Show W '. For example, so that the C ++ style is the same as the C style, it would put the following in FileTypes.cpp: [styling = c] This section contains the keys for different keyword lists of the file type. Complete Word Ctrl-Space shows the list of autocomplete. Note System files Edition are not necessary, since you must use the configuration files per user, which do not need root permissions. CTRL-SHIFT-BACKSPACE Go at the beginning of the document. See Configuration of the compilation menu to obtain information about the configuration of the menu. A most codifications, but there are also some codings where it is known that automatic detection has problems. The most quick way to find some text is to use the search bar input in the toolbar. (This example assumes the default file templates that are being used). Default Action Shortcut NEW DESCRIPTION Å, creates a new project. The default dialog boxes of the Windows file are missing some pleasant features such as choosing a type of filet and coding. Switch to the list of documents in the sidebar. Focus the list tab of documents in the sidebar (if visible). Its distro should provide packages for these, generally installed by default. Disable this option if your configuration directory is in a slow unit, network share or similar and experiences problems. The Subfill of Add-ons of the user's configuration directory: See the configuration file routes. See Focus KeyBindings. For Python, a new line will be bled after writing ':' at the end of the previous line. If the cursor is in the word "eco", a browser window will open the address: . Only available in Windows, Rank of Puerto Válido: 1024 to 65535. Compiling Geany is quite easy. If you can not distribute it to simultaneously meet your obligations under this license and any other relevant obligation, then, as a consequence, it is possible that it does not distribute the program at all. You can expand and collapse categories by clicking on the small arrow on the left side. Message window Change the source used for the message of the message of the message of the message window change the source used for the message of the messag window. The option use exhaust sequences will transform any Escaped at its equivalent UTF-8. This behavior was changed in GEANY 0.11, before the selected characters, even if the complete lines are selected characters, even if the complete lines are selected text is copied to the new position. % n The number of selected text is copied to the new position. Find file dialog box, set the directory to search the directory to search the directory current active file. Save as A ¢ Save the current file under a new name. CTRL-TecheyPad- Restore the size of the text to normal. This is mainly designed so that the authors of complementation detect installation routes. It can be stored and opened a list of session files with the project when enabling the base-based file files â € Reload Configuration. Note Any missing subdirectory in the user's configuration. Note Any missing subdirectory will be created when Geany starts. You can insert a color value by selecting Tools:> Color selector of the menu. Menu Description Available in year in progress. When configuration in True, the Save button and the menu item are always active and the files can be saved. If it is set to false, horizontal and vertical scroll bars are completely hidden. Command: The route executes the specified command and replace the comfort with the standard output of the command. Only the first argument is used (color in the foreground). 620 GEANY_WINDOW_MINIMAL_HEIGHT The minimum height of the main window. File header, fragments, file templates. None -columna set the initial column number for the first open file. The format seems: [groups] Programming = C; C ++; Script = perl; Python; Marked = HTML; XML; Misc = diff; Conf; None = none; The key names can not be configured. Everything you add or change must be within the Route / Toolbar / UI. Go at the end of line END Move the CARTO at the end of the line. Basic simply add the bleeding of the previous line. This Comforter will only be replaced in file templates. False send_cmd_prefix string with which you prefix the commands sent to the shell. 440 GEANY_WINDOW_DEFAULT_WIDTH The default width of the main window at the first start. This word or selection can be used as an argument for the source used for the tab of the sidebar of symbols. Find the use of document Ctrl-Shift-D Find all the events of the word or current selection (see Note below) in the current document and sample them in the message window. There is a basic support for the edition of three pixels. Important The list of keywords must be on a line without final characters of % F The type of document file (for example. Move the document first moves the current document to the first position. It is safer to attach them at the beginning of each source file to transmit more effectively the exclusion of the guarantee ; and each file must have at least the La Lanea and a pointer where the complete notice is located. Then, the file name is automatically inserted in the comment heading that replaces the text as without the tall. Ext in the first 3 lines of the file. This can be used to say that some
Shells (Bash with histcontrol establishing this in a space. If you only want to use multiline comments, do not configure this but more commes open and comment close. To find all the coincidences, click Search All Expander. The current word is the word closest to the edition cursor, or the word closest to the edition cursor, or the word closest to the edition cursor. fragments configuration). Tab-Tab Delate to start word. None, Python, C, etc.). The fragments in the sections of the type of file will hide the fragments with the same name in the "default" section when used in a file of such file type. The predetermined value is 250 ms, which means that the list of symbols will be updated four times per second, even in the document changes continuously. The terms and precise conditions for copying, distribution and modification follow. To help find errors in the execution of the program will be printed at the Estandar departure of Geany. The global configuration file is read from Geany.conf on the system configuration route: See the configuration file routes. Fold symbol highlights the color of folding symbols. The available conversion specifiers are the same as those that can be used with the anxi c strimime function. Repair the CTRL-R (C) file The current file. The first argument defines the amount of space that should be drawn above the line, the second argument defines the amount of space that should be drawn below. The replace dialog box is used to replace the text in one or more open documents. Insert new line after current insert a new lineline sangria Must have received a copy of the GNU General Public License together with this program; Otherwise, write to Fundación Free Software Foundation, Inc. 51 Franklin Street, Fifth floor, Boston, MA 02110-1301 USA. Warning produces a lot of departure. The default value of GEANY_DEFAULT_TOOLS_TOINAL IN Windows is: XTERM -E "/ BIN / SH% C" Option default description geany_build_err_highlight_max Quantity of construction error indicators that They will be displayed in the editor window. Look for a block of lines that start with #define geany *. Default Access Direct Access Direct Access Direct Access Description Search dialog box. Example: run cmd = "./% e" There is a Special file of FileType definition called FileTypes.common. If it is activated, all special characters (next to the exceptions given from above) known by the add-on will be replaced by their entities. If any part of this section is intended to apply and the section as a whole is intended to apply a section as a whole is intended to apply a section as a whole is intended to apply a section as a whole is intended to apply a section as a whole is intended to apply a section as a whole is intended to apply a section as a whole is intended to apply a section as a whole is intended to apply a section as a whole is intended to apply a section as a whole is intended to apply a section as a secti not use the full path for the header, only the file name. Note Automatic bleeding is calculated before the extraction, so although this configuration will delete a blank line, it will not be adjusted to the reference line of the next line to zero. You can use the same format specifiers as in the ANSI C Function () function. The subline is bleeding by at least to make room for the flag. Values are accepted between 0 and 256. Use this option if you do not want to load the virtual terminal emulator widget at the beginning. The manual format is: key = close-up_color; background_color; bold flag; The colors Italic_Flag must As hexagonal values of RGB preset by 0x or # similar to HTML / CSS Hex Triplets. Therefore, you can save a lot of time when writing common strings and letting Geany do the job for you. There are some wildcards that will be automatically. By Geany at the beginning. Geany will not show command line). Note the Keybindings marked "See the note below." Work as it: If no text is selected, the word is used under the cursor, and you have to coincide completely (as when it coincides, only a complete word is enabled in the Basqueda diogogue picture). The position of the cursor and or an existing selection will not be changed. Date format how the date must be printed. For example, Joh? N coincides with John, Jon. Each template can be customized at your needs. There are also two toolbar entrances: Bars that go to the entrances: Bars that go to the entrances of the line there are also an automatic bloody of the XML label. Mime type the mime type for this type of file, for example. "Text / X-CSRC". Note the file settings use -include = when looking recursively, recurred in the Us -R subfolders; Both are GNU GREP options and may not work with other GREP implementations. The replacement dialogue has the same options to match the text as the search dialog box. You can use any conversion specifier that can be used with ANSI C rfftime function. The list of documents using the mouse. Decomposed line a juncation of changing between documents using the mouse. Decomposed line a juncation of changing between documents and the editor's tabs are two different ways of changing between documents using the mouse. select. OPCIIN DESCRIPTION DESCRIMINATED GEANY_STRING_UNTITLED A chain used as the predetermined name for new files. Example: Translucence = 256; 256; False Marker_Line The style for a highlighted line (for example, when the symbol of the GOTO or GOTO line is used. This affects special coloring when Geany detects an output line of the compiler as an error message and then highlights the corresponding line in the source code. In Startup Geany searches for file types. *. Congratulations Rent in the system and user user Trails, adding any type of file found with the name that matches the comfort '*': for example. FileTypes.bar.conf. Only the first and second arguments are interpreted. You can also pass the information of the line number and the number of column, for example, Geany Some_File.Foo :55:4 Geany supports all generic GTK options, a list is available on the Help screen. Example: Linker = GCC - Wall "% F" Run_CMD Use this item to run your file. Folding means the ability to show and hide parts of the text in the current file. After that we are satisfied with your changes, create a patch for example. By using:% git diff geany.txt> foo.patch or even better, when creating a git-formatted patch that will maintain the creation and description data, for the first time your changes are recommended (it does it in a new New branch for the teacher not to diverge from the upstream) and then use the git-patch format:% git checkout -b my-documentation-changes # create a fresh branch% git commit geay.txt Write a good confirmation message ... Mark will highlight all matches in the current document with a color box. Next CTRL-UP PER. While the syntax is the same, some practical differences are applied :. CB} Closing brochure. For more details, see . In Windows, explicit file permissions are not established. In the Preferences dialog box, you can specify a cassing that must be started in the VTE. Make sure that the consistent line terminations in the same file. Remove to the line end ctrl-shift-delete edge of the current line. TRUE immediately statudbar_templa The line format of of the status bar. WARNING MUST USE UTF-8 encoding without BOM for configuration files. Comment_single a fierce or a chain used to comment on a code. To make the specified Shell a session start shell, only use the appropriate command feet options for the ScintilLLA / LICENSE.TXT included with the source code of this program and in the apply of this document. The project file contains configurations related to the project and possibly a record of the current session files. It also known as the commutation of used documents â & Reload Configuration or restart Geany. Developer The name of the developer who will be creating files. See Go to symbol declaration. Pressing Enter will search again, and pressing Shift-Enter will search backwards. 2 Repeat last search. you want to assign to the action and it will be saved when you press OK. SA³ be interpretan los primeros y segundos argumentos. Only available if Geany was compiled with support for VTE. Action Default shortcut Description Cut Ctrl-X (C) Cut the current selection to the clipboard. Using the bookmarking Along with the commands to change from an editor tab to another (CTRL-PGUP / PGDN and CTRL-TAB) provides a particularly rapid way to navigate through multiple files. Change to the last changes of document Shown above (if it is currently open). Using the "Set coding" menu Contrary to the two previous options, this will not change or reload the current file again unless it saves it. (This is recommended in the configuration of the line if you use proportional sources). The fragments are small chains or code constructions that can be replaced or completed to a more complex chain. Immediately new document fer, if to open a new document fer, if to open a new document share small chains or code constructions that can be
replaced or complex chain. the first region tagged through the ninth when searching or replacing. Additional tabs can be added to the sidebar and the message window by add-ons. Double-click the additional widgets, either to call the view-> Toggle all the additional widgets, either to call the view-> Toggle all the additional widgets, either to call the view-> Toggle all the additional widgets, either to call the view-> Toggle all the additional widgets, either to call the view-> Toggle all the additional widgets, either to call the view-> Toggle all the additional widgets, either to call the view-> Toggle all the additional widgets, either to call the view-> Toggle all the additional widgets, either to call the view-> Toggle all the additional widgets, either to call the view-> Toggle all the additional widgets, either to call the view-> Toggle all the additional widgets, either to call the view-> Toggle all the additional widgets, either to call the view-> Toggle all the additional widgets, either to call the view-> Toggle all the additional widgets, either to call the view-> Toggle all the view-> Toggle all the additional widgets, either to call the view-> Toggle all the v regular expression used to find the coding chain: coding [\ t] * [: =] [\ t] * ([A-Z0-9 -] +) [\ t] * Note These specifications must be at the first 512 bytes of the file. Option short option Long function None + Number of initial line number). If you want to use comments from a single line, prefer to configure comment single. You can insert Unicode Code Points when hitting Ctrl-Shift, write some hexagonal diggies that represent the code point for the character you want and press ENTER or WARD (Still CTRL-SHIFT). Transposing the current line with the previous one. Example: marker_line = 0x000000; 0xffff00; false; False marker_search Style to obtain search results marked (when "" dial "is used in the search dialog boxes). When the action of the context is it is The specific Fileype command is used if available, otherwise the Command specified in the preferences DIALOGAL frame is executed. The comments of a single line are used in priority on multylon comments to comment on a line, for example. With the comment / def comment on a line, for example. With the comment / def comment of the word ctrl- \ goto the next part of the comment / def comment command. Go to the next part of the comment / def comment / def comment command. behavior can be changed so that they also coincide with the new lines using the option (? S), see [^ ...] The negative range. It will show a list of self -planning with symbols 'i' and 'C'. Leave blank so as not to establish an additional bove route. Descent of the word at the end remote any part of the software Foundation can public license from time to time. Note can also use the use of elements of the list of symbols in the emerging men's. Remote files are not verified by changes due to performance problems (remote files are files in ~ / .gvfs /). This commoding will only be replaced in the description template of the function. To protect your rights, we must make restrictions that prohibit anyone who denies these rights or ask you to deliver the rights. The printed página (s) will be almost the same as on its screen in Geany. File templates are templates used as a new file. The default codification (existing files) opens The files with the specified encoding to the bleeding mode of the current document. By default, regular expressions coincide in a line of line. If you have the intention of making changes, you must grab the font right from Git to do You have the most recent version. But next to that, you can define almost any chain as a fragment and use it later in Geany. See also Strip Spaces Trailing. By default, the tab will press the selected element by the word; Astil, for example. Para agregar el prefijo gtk combo box entry sin escribirlo manualmente: GTK COMBO BOX GTK COMBO BOX ENTRY GTK COMBO BOX ENTRY GTK COMBO BOX ENTRY GTK COMBO BOX ENTRY Set Text Entry Set Text Entry Set Text Entry Set Text Column La combinaciÃ³n de teclas se puede cambiar desde la pestañ a. Change to the VTE F4 switches to VTE widget. Some templates (such as file heading or Changelog input) will always be inserted at the top of the file. You can copy and distribute verbatim copies of the source of the program, since it receives it, in any medium, provided that you publish and appropriately in each copy and distribute verbatim copies of the source of the that refer to this license and the absence of any guarantee; and give any other recipient of the program. Find the previous Ctrl-Shift-G finds an earlier result. Maybe I often need to write his name, so he defines a fragment of this: [predetermined] Myname = Enrico Transmer of the program a copy of this license together with the program. Geany, he will replace "Myname" with "Enrico Tranger". If this is what you want to do, use the general public license of the GNU Library instead of this license. All these configurations can also be changed in the DIALOGO Press Print just before the real printing is made. Copy the current (s) CTRL-Shift-C (s) Copy the current line (and any line with a selection) to the clipboard. This is ostile to save vertical space. Description key Apply the group 'Editor''. Editor''. Editor''. Editor''. Editor''. Editor''. Editor''. Editor''. Editor''. Editor''. autocomplete number of a word characters to write before the autocompletel is displayed. To avoid this, we have made it clear that any patent must be licensed for the free use of all or not licensed at all. Neil Hodgson renounces all the guarantees, in no case. Neil Hodgson will be responsible for any s special, indirect or consequent damage or any damage resulting From the loss of use, data or earnings, either in an enforcement, negligence or other tortuous action, which arises from or in relation to the use or performance of this software. On the contrary, the Genu GNU Public License intends to guarantee its freedom to share and change the free software, to ensure that the software is free for all its users. You can define whether to print a page header on each page and if you want to print a page header on each page. SHIFT extends the selection. 6. If you do not like this for some reason, you can disable using the free software is free for all its users. first instance using the appropriate command line options. Examples: [] | -] Matches these 3 characters [A-Z] any minimum alpha [^] -] Any character except Y] [^ A-Z] Any characters [A-Z] any minimum alpha [^] -] Matches these 3 characters [A-Z] any minimum alpha [^] -] Matches the section called Command Line options. it is used inside a set, see more above). 600 Specific Windows A, A, geany use win32 dialog Configure this to 1 if you want to use the default Windows file Open and save the default regex to extract types of file files. Geany can automatically insert a closure bracket and press characters when you open them. The following format characters are available for the status status template: Status: DESCRIPTION% L The current line number that starts at 1% l The total number of lines% C The current line number of l the Alt-Home visualization line Move the Caret at the beginning of the display line. Select the current Paragraph ALT-SHIFT-P Select the current paragraph below the cursor that is defined by two empty lines around it. This adds the default configuration to the user file if the file does not exist. Open a project file. It could be, that the library is called another thing that libvte.so (for example, in FreeBSD 6.0, is called libvte.so.8). Close all CTRL-SHIFT-W Close all open files. (Exception: If the program is not obliged to print an ad). These requirements apply to modified work as a whole. Do not change it unless you really need; Use the sangria configuration instead. The use of this encoding opens the file as it is without any conversion of characters. The {Command:} Wildcard is a special because you can run a specified command and put the output of the command (stdout) in the template. The option -O is automatically added by Geany. Each version receives a distinctive number of the version. See also compilation time options. Editor changes the source used to display documents. Proyere the name of the Current, where appropriate. You are not responsible for enforcing compliance by third parties in this license. To navigate through your document, jumping from a brand to the next, use ctrl-. Next error error Skip to the line with the following error of the last compilation process. Any attempt that otherwise copies, modifies, sublicense or distributes the program is empty and will automatically end your rights under this license. Usually, you do not need to set an additional route to look for the add-ons. For more details, see . Near the top there must be 2 lines with something as well as: geany-info: system data dir: / usr / share / geany geany-info: user configuration dir: / home/unname/.config/geany System is \$ prefix is the path where \$ prefix is \$ prefix is the path where \$ prefix is \$ the unsafe file that saves the backend. Use Windows File Open / Save Dialogos Define whether you want to use the Open / Save Native Windows files or if you want to use the GTK default dialogs. Show calltip ctrl-shift-space shows a call call for the current function or method. Note The Dialog Option Using Scape Sequences always applies always for regular expressions. Color of the long line marker. Trails You can cancel the predetermined fragments using the user Snippets.conf file. Therefore, there
is no need to install the package that contains this file to execute geany. Replaces the spaces with the tabs. Replaces with tab characters throughout the document, or the current selection. Mailing The developer's email address. Geany can offer a list of possible completions for the symbols with the same To which the GOTO can be performed, a pop-up window with a list of all appearances is displayed. You can also specify the File name of the VTE library to use it in the command line option, with the module path -Module vte a ./configure. If a document is saved through the document-> Save as You can define multiple% of cursor gauge fences and use the keychain movement cursor in a fragment to jump to the next position of the cursor defined in the start. % C The current column number that begins to 1, including virtual space. See below. Some less common commands without the menu equivalent: Action key access key Magnify the text size. These configurations will persist between the Geany sessions. "Make" geany default tools terminal emulators command, see terminal emulators. Usually, it is better to store all your project files in the same directory (they are independent of any source directory). If you are interested in regular expression of multiple lines, it coincided with all the bone at a time, see the Regular Expressions section of the Multi-Line section continued. Geany provides a practical marker function that allows you to dial one or more lines in a document, and return the cursor with them with a combination of keys. Paste CTRL-V (c) Paste the text of the clipboard in the current document. In addition, Geany detects a byte Unicode order brand (see for more details). Copyright (c) Project, apply the default indentation menu item. Change to the right document Ctrl-Pagedown (c) Changes to the following open document. For example, geany function menu item. Inside the description template of the function. This will reveal several options: In the document at the Mark Session Search all in the document on the message window. -V -version show information of the version and exit. Keep in mind that you will need the Python Docutils software package installed to build the documents. Here is a sample; Alter the names: YoYodyne, Inc., hereinafter renounces all interests of copyright in the 'Gnomovision' program (which has passes in the compilers) written by James Hacker. Note that you can define alias for the name styles, as shown with the bar input in the previous example, but must be declared after the original style. None [files ...] Open all files given at the beginning. Dynamic description of wildcards available in the chain "No title" (this without title "(this wild be translated into your location), used in file templates. Always envelop the search you always wrap the search around the document when finding a coincidence . The keyboard equivalents of the menu commands are listed in the menu. 1. You can also configure some specific options of the add-on if the add-on if the add-on if the add-on administrator dialog allows you to choose which addons must be charged at the beginning. It is not the purpose of this section to induce it to infringe any patent or other Rights of property or that agrees the validity of said claims; This section has the only proposition to protect the integrity of the software distribution system Free, which is implemented by Public License Practices. The It can be moved to the virtual space, but a real space will not be added to the document until there is any written text or another text insert command is used. This general public license applies to the majority of the Software Foundation software and any other program whose authors are committed to using it. If you are disabled, geany directly directly The content of the document to the disk. You can define sections with the name of a type of file, for example, "C ++". The life values for the first argument are: 0 - Disable, do not draw a line 1 - Draw the folded text line 2 - Draw the folded text line 2 - Draw the line below for example of folding text: foldin visual flags to indicate that a line is wrapped. This complement creates a backup copy of the current file in Geany when saved. The position of the tabs can be selected in the preferences of the interface. Using the Men's element "Recharge as", this element "Recharge as", this element recharges the current file with the specified encoding. "Intelligent" start key If you move the cursor to the first non -spatial character in the line when you press the start key on your keyboard. Lities visible around the cursor the number of lines to keep between the cursor and the upper and lower edges of the view. The corresponding keys control is called complete fragment. You can also adjust the format of the date and time added to the header header. It will need the GTK libraries (> = 2.24) and their dependencies (Pango, GLIB and ATK). Copyright â © 1998, 2006 Neil Hodgson This apartment is distributed under the terms of the license for scintilla and scite. Geany is a small and light integrated development environment. If Libvte has installed. So in his system, Geany loads it automatically, and will have a terminal widget in the notebook at the bottom. This document (geany.txt) is written in restructured (or "rest"). For the tabs and spaces of bloody, the bloody will use the same combination of characters as the previous line. It must be an absolute path. However, these variables are always established, only perhaps with a value Keep in mind that the command is not executed in a Shell, so if you want to use Shell functions such as pipes and command in the current word in the current word in the current word in the shell explain t for the first open file. The item highlighted in the autocomplete list can be chosen from the list by pressing ENTER / RETURN. If set to TRUE, use any sangria of the line. You can use any conversion specifier that can be used with ANSI C rfftime function. At the start, GEANY loads all the files of the last time that geany was launched. You can set an optional description for the project. Load the virtual terminal holder Load the library to run a terminal on the area of the message window. It is not alphabetic as shown in the list of documents (regardless of whether the publishes of the amount established by the first argument 1 - The wrapped is N Align themselves with the first subline sangrine (use the same slit) 2 - the sublies wrapped is N Align themselves with the first and second arguments are interpreted. The base path field is used as a directory to execute the commands of the compilation menu. You can disable this feature in the Preferences dialog box (see General Start Preferences). Use this option if you do not need compiler messages or TEV support. The sizes of the sidebar and the message window can be adjusted by dragging the dividers. Block Ctrl-Keypad / sangria. Navigate to Care A ALT-LEFT location (c) changes to the previous location in the navigation history. True immediately GIO UNSAFE SAVE BACKUP Make a backup when using Gio Insecurt File Guard. Compilation commands à ¢ Opens the compilation command dialog box. See the GNU General Public License to obtain more details. True immediately indent hard tab width The size of a tab of tab. Show markers show or hide the small margin to the right of the line numbers, which is used to mark lines. Lexer FileType A file name type to configure entry. FileType A file name type to configure entry. Description of comfort available in the developer. After inserting a large number of text, for example. When using Copy and Paste, the add-on allows bulk replacement of all known characters (next to the aforementioned exceptions). Increase individuals The current line or selection by a tab or with spaces in the amount of the width configuration of the table form in the construction menu item is executed, print the status of the table of the menu element in the table form in the configuration of the compilation menu. Use this with care because you can break things seriously. The context enforcement is invoked by means of a menu entry in the editor's pop-up menu and also a keyboard direct access (see section called KeyBindings). This option determines the frequency with which the list of symbols is updated for the current document. However, the configurations in the document menu are only for the current document and return to the default values when restarting the GEANY. Default format: yyyy-mm-dd. It is not limited to the existing data of certain programming languages (as if, for, change). To do so, attach the following notices to the program. Therefore, it is not the intention that this section claims rights or contest your rights to work fully written by you; More, the intention is to exercise the right to control the distribution of derivative or collective work based â € Insert special HTML characters. List of ending height of the number of rows to show for the autocomplete window. message window. The current project settings are saved when it is closed, or when GEANY turns off. You can adjust the command to which the file name is passed in the Preferences dialog box. We want to avoid the danger that redistributors from a free program individually obtain patent licenses, in fact, which makes the program owner. To search in all .c and .h files, use: * .c * .h. For example, yes Patent license would not allow all who received copies directly through IT, then the only way in which it could satisfy both and this license would be refrain from abstaining completely from the distribution of the program. If there is a selection, only the selected text is copied. This can be disabled Disabling See the preferences of Bã^oSqueda. Use session files based $\hat{a} \in \hat{a} \in \hat{a}$ and its terms, do not apply to those sections when they distribute them as separate works. Key indentations eyebrows If
established, press the tab will bleed the line or current selection, and unidire by pressing the Mayãos tab. Example: line height = 0; 0; FALSE; FALLTIPTS THE STYLE to color calls. ALT-0 Select the right eyebrows. Fragments Move the cursor in a fragment a jumps to the following cursor positions defined in a completed fragment if there are positions of ma^oltiple cursor where they are defined. The built -in Filletype Foo Foo is: Fileypes.FOO The extension is normally, only the name of Fileype in Minisculas. New line strips The drag spaces eliminate any blank space at the end of the line when it reaches the Enter / Returo key. The first argument is used. Show the toolbar, either to show the toolbar. 3. Example: Current line = 0x0; 0xe5e5e5; real; FALSE INDENT GUE THE SANGRIGE GUÍAS. This can also include a path. There are some commands listed in the key diaogen box that is not, by default, united to a key combination, and it is possible that it is not available as a men's element. All missing configurations will be read in the system of the current file. If its value is something more than "true" or "false", "false" is assumed. The predetermined system of the choice system Any style of icon set by GTK. Additional add-on route preference (usually blank): See the routes. The extensions). A chain with: A-Z, A-Z, 0-9 and underlined. Move upwards by a Alt-Up line displaces the view. After changing the default configuration, you may want to want The new configuration to each document at the current session. If the line is not wrapped, it behaves like going to the end of the line. This file is used to store the information, Geany's needs at startup, while separate FileType defining files have the information that is only needed when using a document with its

type of file. If nothing is selected, by default, the current word is used in its place. Any definition that is not listed here should not be changed. This header contains the file name of the printed document, the current page number and the date and time of the print. that you would like to use within your document. Some types of files do not support keywords, so adding a new key will not work. The contents of the file are only the text that is placed on the document, with optional template wildcards such as {fileheader}. Autocomplete symbols When you start writing a symbol name, look for the full chain to allow it to be completed for you. All, in addition, the files have been ignored. This could be useful when it often creates new files just to prove some code or something similar. Note that the leading spaces should escape using S in the configuration file. The fragments of that section are only available for use in files with that type of file. Switch to the seam bar F7 Switches to the search bar on the toolbar (if it is visible). The syntax is compatible Perl. For example, to cancel the fileType groups are used in the Document Menu-> Configure the FileType Menu. E.g.: Struct {int i; char c; } foo; When Foo. The special characters] and - do not have a special meaning if they appear first in the whole. 5. It coincides with any character but arrived. Finding the following CTRL-G is next result. The user's configuration directory can vary, but at Windows XP is: C: \ Documents and Y and Data \ Geany in Windows 7 and higher than more likely is that you find it in: C: \ UseM \ UserName \ Roaming \ Geany System Administrators can add a global configuration file for Geany to be used when Geany starts and a user configuration file does not exist. There are different ways to set different ways t drop-down box. Move the line (s) up Alt-Pageur Move the current line or the lines selected by a line. It is better in most situations, but it is known that it does not work properly in some complex configurations. It is also possible that you would like to double click on the chosen entity. Example: marker translucence = 256; 256; false; Fake line height Quantity of space to be drawn up and below the baseline of the line. Characters of blank space are in this case a space or eyelash car. If there are unbertained changes, the user is asked to recharge manually. Margin folding double margin close-up and background colors. Cut the current line (s) CTRL-SHIFT-X Cut the current line (and any line with a selection) to the clipboard. For example, if you distribute copies of that program, whether free or for a fee, you must give recipients all rights you have. Geany also recognizes the information of the line and the column when added to the file name with Colons, for example, if you distribute copies of that program, whether free or for a fee, you must give recipients all rights you have. line 10 in column 5. Long line marker Set this value to a value greater than zero to specify the column where it should Appear. You must be able to accept and process plain text files. Fileheader's comfort can be placed in any But it usually gets on the first line of the file, followed by a blank line. The line wrapping shows long lines wrapped to new display lines. Look to go to the definition of the symbol. In systems similar to UNIX, using a byte order brand could cause some problems for programs that do not expect, for example, the GCC compiler stops with the street. Street. FT Regex by default. When enabled, automatic self-trading occurs when entering Enter in the editor. B This coincides with a limit of words. Display close the open documents. In the editor window, there is a small gray margin on the left side with [+] and [-] symbols showing hidden parts and hide parts of the file respectively. That command must ideally delete the temporary file to which it is referenced in% f. If you want to incorporate parts of the program into other free programs whose distribution conditions are different, write to the author to request permission. The type of file to be used is detected from the extension of the template file, if applicable. E.g. Key = 0xFF0000 ;; True This causes the key style to have red close-up text, default background color text and audacious à © is. 900 GEANY WINDOW DEFAULT HEIGHT The default background color text and audacious A always have to bleed each line manually. List of recharge symbols Ctrl-shift-R recharges the list of symbols. Note There are also configurable keys separated for sangria and uninivit, but this preference allows the Tab key for the end of the fragment. + This coincides with 1 or more times. Copyright © 2005 The GEANY CROPORTHIS document is distributed under the terms of the GNU General Public License, as published by the FREE Foundation Free; Whether it is the version 2 of the license, or (in your option) any subsequent version. ? Scintilla keyboard shortcuts will be annulled by any personalized key with same keyboard direct access. In the status bar, you can easily see if the file starts with a BOM or not. % ..., " ..." means the name of a key in the "Special" section. If the distribution and / or use of The program is restricted in certain countries, either by patents or by copyright that places the program under this license can add a limitation of explicit geographical distribution that excludes the Paises, so that the distribution is allowed only in or, therefore, between the countries. Block of spending of the tab. 3 In reset number exec menu items the maximum number of elements of the menu in the execute section of the compilation menu. In subsequent cases, you can find these files on the file menu under the "Recent files" item. It gives information about the file that is editing as the line and the column in which it is activated, whether modifications, file encoding, file type and other information are made. VALID values for the first argument are: 1 - for straight lines 2 - For default curved lines; Folding Style = 1: one: Arrows; foldable style = 3: 0: Folding horiz line Draw a thin horizontal line in the line where the text is folded. The directory of the document, unless this field has already been edited and the current document has not changed. Most of these can be configured a status bar in the preferences of the interface, the View menu or the pop-up menu for the corresponding area. After selecting a symbol. You can add, delete and reorder the items in the toolbar using the toolbar editor, or manually editing the UI Toolbar.xml configuration file. Match the keys similar to the current characters, but the Closing will be aligned to match the line of the display line. Automatic focus widgets (focus continues to mouse) give the focus automatically to the widgets under the mouse cursor. For example, example, A MODULE.C file will add a menu item that created a new document with the file type set in 'c'. Default Action Shortcut Descriptive function. The File Patterns field allows you to specify a list of file patterns for the project, which can be used in the Search file dialog box. Message window. Anything after the first 512 bytes will not be recognized. This is used, for example, to choose the icon to show it for this type of file. Example: indent guide = 0xc0c0c0; 0xffffff; false; False White Space style coloring on white space if shown. Add information on how to contact you by email and email. The preview file opens with a PDF viewer and, by default, GTK uses EviCince for the pre-printing. CTRL-SHIFT-HOME Go to the beginning of the visualization line. Show line numbers Sample or hide the number of line number. When restarting the geany, the previously open project file that was in use at the end of the last session will be reopened. 2 About the reset group `` socket``. 'SOCKET REMOTE CMD PORT TCP Number of port to be used for communication between processes (ie, with other instances of the geany, for example, "Open with Geany"). And you must show these terms so that they know their rights. END OF TERMS AND CONDITIONS How to apply these terms to your new programs if you develop a new program, and â €
